

EMERGENCY MANAGEMENT

PROGRAM OVERVIEW

Emergency Management is the academic discipline providing education and training on theoretical and practical concepts and issues related to preparedness, planning and mitigation for disaster-resilient communities. The Bachelor of Science in Emergency Management (BSEM) degree program will provide an in-depth understanding of the essentials of emergency management and prepare you to apply theoretical underpinnings of the field to practice. You will learn based on an all-hazards approach and gain knowledge from a scientific perspective to study the global, national, regional and local impacts of these events. Completion of an internship or applied experience that focuses on application of theoretical information covered in major courses will expand the hands-on and practical elements of the degree curriculum.

PROGRAM BENEFITS

1. Prepares students for a broad range of career fields in both the public and private sectors, ranging from but not limited to jobs in emergency management and across other related fields, from business to industry to education and community development.
2. Includes an inD 25 (y de)-9lpi

- Apply theoretical underpinning of emergency management to practice.
